# QUESTION:

Assuming you are hired as a Website Developer by one of the top Tours and Travel Companies in Uganda called “**Safari Uganda.**”

Create a visually appealing and functional website for **Safari Uganda** with at least 5 pages. The website should highlight the company's offerings, story, and customer engagement.

## Requirements

### 1. Home Page

- Featured image slider showcasing beautiful landscapes and activities in Uganda.
- Brief introduction to Safari Uganda, including mission and values.
- Navigation menu linking to other pages.

### 2. About Us Page

- Company's history and vision.
- Team members with photos and short bios.
- Testimonials from previous customers.

### 3. Tour Packages Page

- List of available tour packages with images, descriptions, and pricing.
- Filter options for different types of tours (e.g., adventure, family, cultural).
- "Book Now" button linked to a booking form.

### 4. Gallery Page

- A grid of images showcasing past tours, wildlife, and landscapes.
- Option for users to submit their own images for potential inclusion.

### 5. Contact Us Page

- Contact form for inquiries (name, email, message).
- Company contact information (phone number, email address, physical address).
- Integration of Google Maps to show the company location.
